

## **Foreman's Report September 7 thru October 4, 2013**

Aside from routine road maintenance, we have been working nearly exclusively at the park.

Ethan and Steven are still hard at it, and their time working on eradicating invasives is winding down.

### **Big Bay Town Park**

Robert has gone back to St. Cloud and is done working for the time being, and probably for the year.

The new campground area is basically completed with the work the Town crew was to do, other than a few odds and ends, and placing the wood chips on the trail. Bathroom #2 has the blocks up, but is awaiting the trusses for the roof. Five Star Electric has the meter pedestal and junction boxes up, and ready for Xcel to install the primary power and have started installing campsite electric pedestals.

Respectfully Submitted,
